EDUCATION

JSS Academy Of Technical Education   Noida, Uttar Pradesh, India
B.Tech in Computer Science And Engineering *CGPA: 7.5*   2020 - 2023

Government Polytechnic, Shahjahanpur   Shahjahanpur, Uttar Pradesh, India
Polytechnic in Computer Science And Engineering *CGPA: 7.5*   2017 - 2020

EXPERIENCE/OPEN-SOURCE

Kubernates
Web page load time and code complexity was reduced, and the frame tag was used in place of the embedded image. Link

PROJECTS

WeReal | *ReactJs, NodeJS, ExpressJS, MongoDB, REST API* | **Link**   *5 Jan 2022- Present*
- Developed a real-time code editor so multiple users can write code simultaneously.
- Users can create a new room or join via generated id, uuid npm package used to generate an id.
- Used Open-Source CodeMirror JavaScript component to create a code editor for multiple users.
- Implemented Toast Notification for creating notifications, and Socket.io for connecting multiple users at
- at the same time.

BookMyHotel | *ReactJs, NodeJS, ExpressJS, MongoDB, REST API* | **Link**   *Aug 2022 - Sept 2022*
- Developed a real-time code editor so multiple users can write code simultaneously.
- Users can create a new room or join via generated id, uuid npm package used to generate an id.
- Used Open-Source CodeMirror JavaScript component to create a code editor for multiple users.
- Implemented Toast Notification for creating notifications, and Socket.io for connecting multiple users at
- at the same time.

Blog Website | *ReactJs, NodeJS, ExpressJS, MySQL Workbench, REST API* | **Link** *Aug 2022 - Sept 2022*
- Developed a real-time code editor so multiple users can write code simultaneously.
- Users can create a new room or join via generated id, uuid npm package used to generate an id.
- Used Open-Source CodeMirror JavaScript component to create a code editor for multiple users.
- Implemented Toast Notification for creating notifications, and Socket.io for connecting multiple users at
- at the same time.

Code Share| *ReactJs, NodeJS, ExpressJS* | **Link**   *Aug 2022 - Sept 2022*
- Designed a desktop application and used QML and PyQt5 framework for creating interactive GUI.
- Users can compress image size from high to low and medium quality without losing image pixels quality.
- Users can compress the image quality of single or multiple images at one time, without uploading images using the internet.

TECHNICAL SKILLS

Languages:	C/C++, JavaScript, HTML, CSS, Python, SQL
Frameworks:	ReactJs, SCSS, MaterialUI, NodeJs, ExpressJs
Developer Tools:	Git, Github, Linux
Databases:	MongoDB, MySQL
Course Work:	Data Structure and Algorithms, Object Oriented Programming, Computer Networks, Database Management System, Operating System.

ACHIEVEMENTS

Secured Global Rank 81 in **CodeChef** Long Challenege

Solved 200 Plus problems on **Codechef**, **Leetcode**, and **Geeks For Geeks**
